

Checklist no. 2

While you work

MIXING SAFELY

- ☐ Timer started (to keep track of pot life)
- ☐ Components weighed accurately at the specified ratio; scale tared correctly
- ☐ Poured slowly and carefully to avoid splashes
- ☐ Mixed thoroughly for 3 minutes (3-3 mixing method)
- ☐ Poured into a clean, dry, reusable mixing cup (double-cup method)
- ☐ Mixed again for another 3 minutes with a timer
- ☐ Residue from the bottom and sides of the cup carefully worked in
- ☐ Air bubbles avoided with calm, circular movements
- ☐ Temperature of the mix monitored

POURING SAFELY

- ☐ Even, controlled pour, pour depth respected
- ☐ Surface not touched while pouring
- ☐ Pouring area kept free of dust and particles
- ☐ Pour kept under watch while you work; in an emergency, your safety comes first
- ☐ Pouring in layers: correct waiting times observed
- ☐ Heat buildup watched closely
- ☐ Tools placed on a silicone mat or in a tray after use
- ☐ Spills cleaned up right away so nothing leaves marks or sticks
- ☐ Air bubbles removed deliberately, e.g., with a heat gun, but without overheating

KEEP CHECKING

- ☐ Gloves changed immediately at any sign of wear or holes
- ☐ Ventilation running continuously and effectively
- ☐ Drafts controlled so dust doesn't swirl up
- ☐ If in doubt, stop working immediately and review your measures
